*"I have met some American families who have lost their children in Iraq, and I am very sad for them in the same way and to the same degree that I am sorry for the people of my own country. When I met them, we were not speaking, we were just shedding tears because we felt the same way... When I said to one father that I was sorry for the death of his son, he came to me, put his hand on my hand and said, 'I'm sorry that my son was helping to destroy your country.' This means that both of us were victims of this wrong policy." —Dr. Rashad Zaydan, a Baghdadi native, is a pharmacist and mother of four, interviewed in March 2006.*
